

## Preservation of Bodily Autonomy and Civil Liberties Proposed Law

### **Preservation of Bodily Autonomy Central to Civil Liberty**

Civil Rights and Liberties are proclaimed in the Declaration of Independence, the Nuremberg Code (Informed Consent) and protected in the Constitution, to ensure our unalienable rights to bodily autonomy. Medical ethicists have long maintained that a patient who has been coerced to consent to injection of biotechnology or a medical procedure, due to fear of losing access to basic necessities (i.e. food, medical care, education, employment, travel, freedom) should **not** be presumed to have provided lawful informed consent to the injection or medical procedure. Medical mandates and coercion violate the Nuremberg code and our unalienable rights to bodily autonomy. The American people must retain their ability to make their own medical decisions through education and informed consent, with equitable alternatives. Liability free products must be offered without mandates, coercion and restrictions of freedom placed upon the U.S. citizens. We must learn from our history or be doomed to repeat the great injustices of our past. Please protect the American people from another potential great civil and human rights travesty.

### **We hereby propose the following law:**

### **Preservation of Bodily Autonomy Central to Civil Liberty**

No state party shall, even in the time of emergency threatening the life of the nation, derogate from the *BILL OF RIGHTS/CONSTITUTION (COVENANT'S)* guarantees of the right to freedom of speech and assembly; right to life, liberty, and pursuit of happiness; right to retain livelihood; freedom from torture, cruel inhuman or degrading treatment or punishment, and freedom from mandated medical or scientific experimentation without free consent; freedom from slavery or involuntary servitude; the right not to be imprisoned for contractual debt; the right not to be convicted or sentenced to a heavier penalty by virtue of retroactive criminal legislation; the right to recognition as a person before the law; and freedom of thought, conscience and religion. These rights are not derogable under any conditions even for the asserted purpose of preserving the life of the nation. *(Based on Excerpts from "The Siracusa principles on the limitation and derogation provisions in the International Covenant on Civil and Political Rights" and Universal Declaration of Human Rights)*

All Government institutions, and private institutions receiving government funding, are **prohibited** from any form of coercion or discrimination based on vaccination status. The purpose here is to prevent government powers and funds to be utilized toward withholding services, refusing entry, imprisoning, fining, detaining, denying commerce, denying access to basic necessities (i.e. food, travel, medical care, education, and employment), restriction of freedom, or denying access to participate in societal activities, simply based on vaccination status or refusal to take a medical intervention.

**Declarations and Definitions as follows:**

1. Individuals have a fundamental right to make their own health decisions and to be free and independent and safeguard and maintain their inalienable right of self-determination.
2. Prohibit Restrictions and Coercion. Even in response to an emergency, including but not limited to a national security emergency, state-wide emergency, local or other health emergency, or any peacetime emergency,
  - (a) all government, public, and private institutions receiving government funding, may not infringe upon, put conditions on, restrict, or removal of a person's fundamental right to make health decisions for themselves and/or their dependents, or their ability to fully participate in necessary and important services, lifestyle choices and preferences including but not limited to education, daycare, employment, travel, religion, hobbies, entertainment, sports, and lifestyle preferences, based on a person choosing to decline recommended responsive countermeasures.
  - (b) The term countermeasures includes but is not limited to:
    1. Medical treatments or procedures;
    2. Testing;
    3. Physical or mental examination;
    4. Drugs or Vaccination
    5. Experimental procedures and protocols;
    6. Collection of specimens;
    7. Participation in tracking or tracing programs, or permanent digital footprints, Digital Health PASS;
    8. The wearing of PPE, i.e. masks or anything that restricts airflow;
    9. Stay-at-home recommendations or the maintaining of measured distance from other humans and animals that is not otherwise unlawful.
3. Preserve and/or Restore Religious/Personal Belief Exemptions in all states. Federal Funding shall be withheld from any state violating the fundamental rights of the order.
4. Civil Rights, Liberties and the Constitution shall not be superseded by edicts of public health officials.
